

PURE

PLA PLASTIC

Line of products made of PLA (PoliLactic Acid), deriving directly from corn starch from certified cultivations, based on natural components and with no addition of chemical stabilizers.

ENDURANCE

The high density and resistance material grants to all the products long lasting use in all conditions.

COLOR

The items are supplied only in crystal clear color, without any industrial dye, in order to maintain intact the purity, with the maximum respect for the environment.

100% ECO-SUSTAINABLE

Products are 100% biodegradable and compostable. At the end of their life they must be conferred in the humid fraction of urban waste, obtaining in such way a utilization cycle with zero environmental impact.

Have you ever
seen a Plastic field?
